

FINAL STATEMENT

▶ Executes code when a specific condition is satisfied

LECTURE 3: BOARD AND EXECUTIVE STRUCTURES

```
if (temperature < 50):  
    print("wear a coat!")
```

# IF STATEMENT

- ▶ Executes code when a specific condition is satisfied

```
if (temperature < 50):  
    print("wear a coat!")
```

### ELSE STATEMENT

- Indicates code to execute when the condition is not satisfied

```
if (temperature < 50):  
    print("wear a coat!")  
else:  
    print("no coat required.")
```
